

A dishwasher designed
to last for years.

DW60 Dishwashers.

A dishwasher designed to do more.

ASKO's new DW60 is connected, meaning you can unlock even more functionality with the ConnectLife app. We've put the same amount of thought into our connected features as we have with our hardware, meaning we've made a dishwasher that does not compete for attention, but hands you useful tips and makes your dishwashing more flexible. It can tell you when something's wrong or when it needs its auto-dosing compartment filled up.

Auto Dose - asks less of you

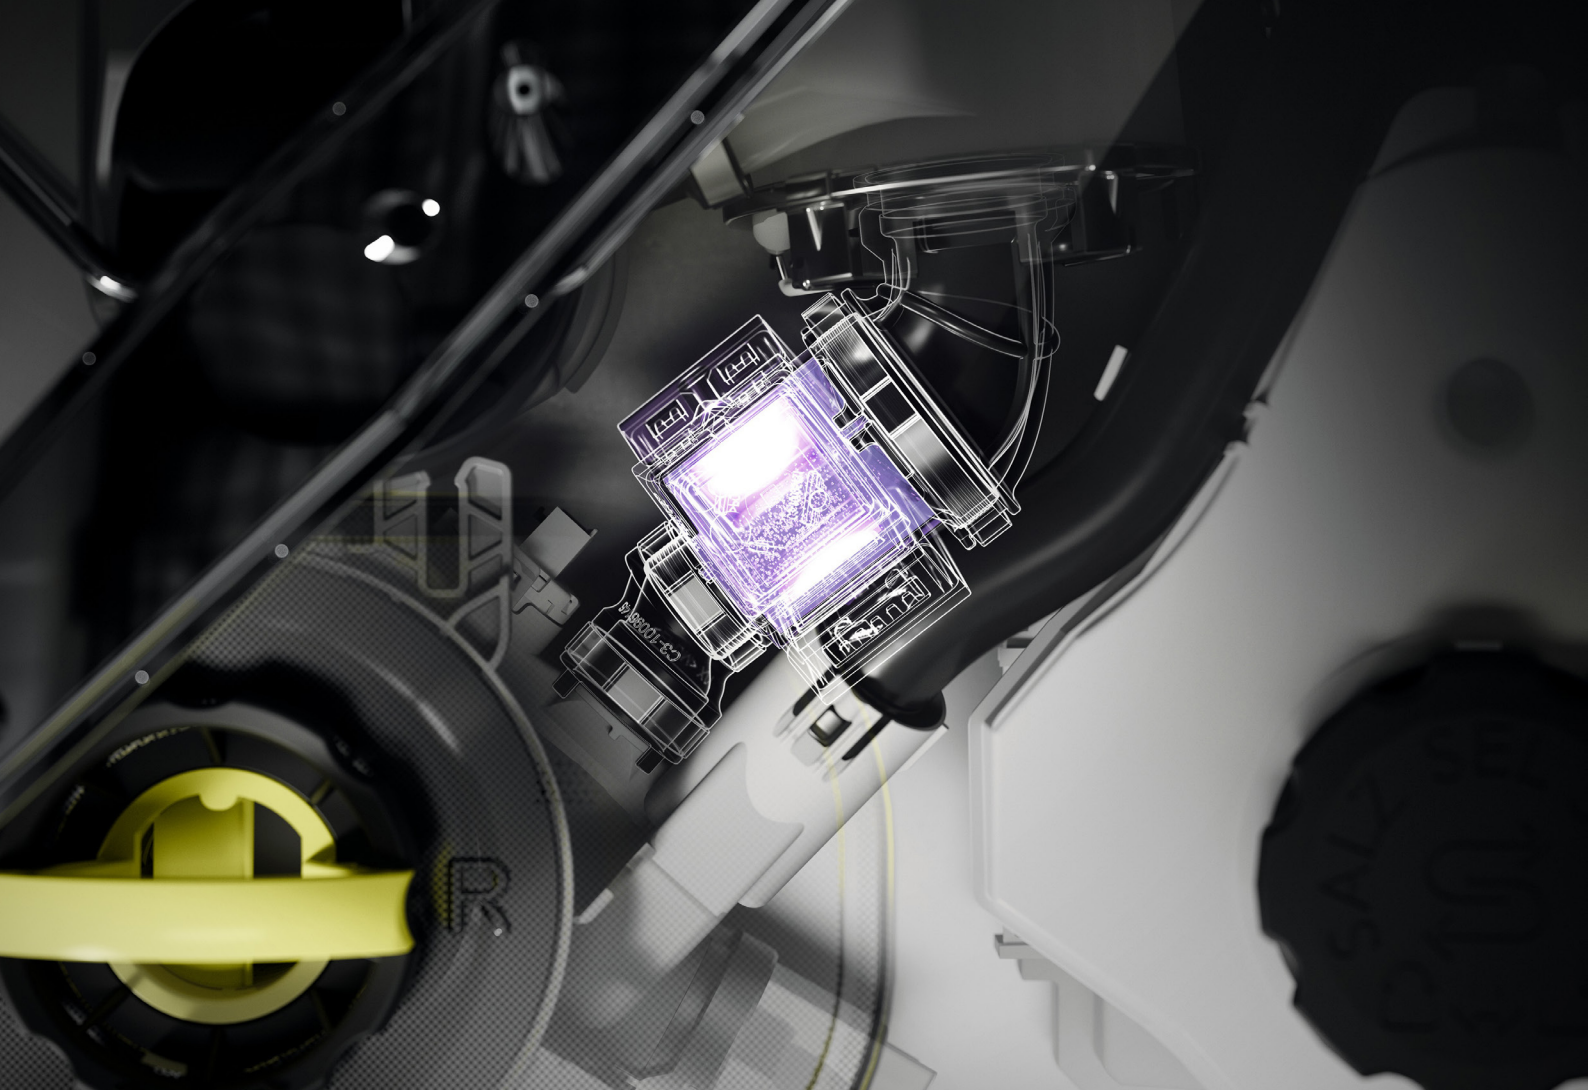

The auto dosing compartment of ASKO dishwashers stores up to 30 days of detergents and can be conveniently filled on top of your worktop. Our new ASKO detergents are specifically developed to work well with the auto-dosing feature, and is effective even in short programs.

It makes room.
It makes a room.

Largest loading height on the market

The DW60 has an impressive loading volume. A loading height of up to 58 cm (XXL dishwashers) or 54cm (XL dishwashers) means that there is plenty of room for even the largest and most awkward kitchen objects. Closing the door puts the machine back in its place – where it doesn't compete for space or attention.

Let there be light.
UV-cleanse mode.

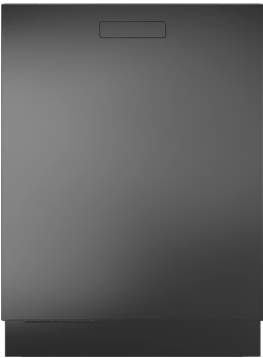

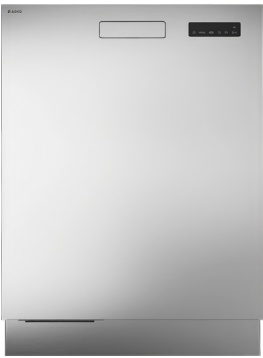

UV Cleanse mode is a new ASKO innovation, unique to our DW60 series of dishwashers. It uses UV light to help eliminate up to 99.99999 % (*) of bacteria, fungi, viruses and more that can find their way onto your dishes and into your dishwasher.

* UV Cleanse mode in combination with intensive or hygiene programs. Tested against standard QB/T 5133-2017.

Focus points. A hint of nature.

Opening the door of our new dishwasher can open your eyes to a few things. The high-grade steel might catch your attention at first. Then it may be one of the machine's many clever features. These are highlighted with a colour that mimics the ways in which nature brings focus to things. It makes DW60 our most inclusive dishwasher ever.

Built to last.
Designed to be used.

Today, sustainability and responsibility go hand in hand. So when we design our products, it is our responsibility to not only make products that last, but which also make things better – for our customers and for the planet. It was this approach that led to our latest dishwasher: **the DW60**. Developed responsibly. Designed to make a difference. And built to be enjoyed for years.

ASKO
Inspired by Scandinavia

ASKO IS PROUDLY DISTRIBUTED IN NEW ZEALAND BY APPLICO LTD, A JONES FAMILY BUSINESS.

Whilst every care has been taken in the preparation of this publication, Applico does not warrant the accuracy or completeness of the information. Features vary by model.
